natural shower filter
AQ-001SF

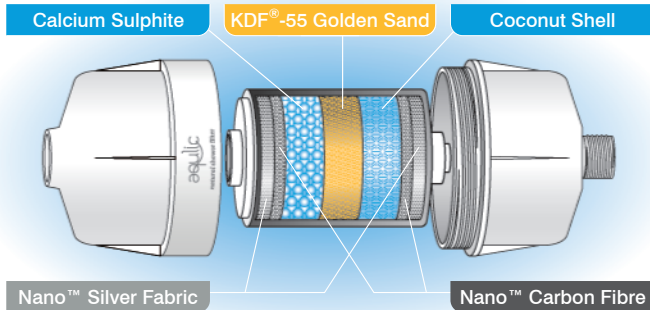

PURE
water
PURE *pleasure*

The aqulic® natural shower filter purifies the water in your shower, so that it feels like pure spring water is cascading over you.

The aqulic® natural shower filter is easy to fit and, once fitted, simply works as part of your shower plumbing*.

Discover complete purity

Aqualic AQ-001SF

The aqualic® natural shower filter utilises layers of different advanced materials to remove all impurities from your water, including chlorine, hydrogen sulphide, iron oxide, dust, sediment, odours, fungi and bacteria.

These layers include the KDF®-55 'golden sand' copper and zinc filter that removes harmful chlorine and other chemicals, so the essential proteins in your hair and skin aren't being bleached and dried out by tap water. Then a separate Nano™ Silver layer of filtration filters out bacteria, ensuring completely pure water.

It's like showering under a waterfall

Our skin and hair need purity in an increasingly polluted world. Why buy expensive beauty products to restore the natural balance, when your water is part of the problem? The best way to naturally cleanse your skin and hair is by purifying the water in your shower. So buy an aqualic natural shower filter for a spa experience – at home.
